# Annie Prasanna Manoharan

+1 (479) 301-1366 | annieprm0501@gmail.com | https://annie0159.github.io/Portfolio/ | https://github.com/Annie0159

## Education

**University of Arkansas** Aug 2024 – May 2026
*Master of Science in Computer Engineering* *Fayetteville, AR*
**Coursework:** Algorithms, Database Management Systems, Advanced DBMS, Data Mining, Artificial Intelligence, Machine Learning, Image Processing, Privacy Enhancing Techniques

**Sri Ramakrishna Engineering College** Aug 2019 – May 2023
*Bachelor of Engineering in Electronics and Communication* *India*

## Technical Skills

**Cloud and Tools:** AWS Glue, AWS Lambda, Google Cloud Platform, Git, Linux, Docker, Grafana, MongoDB, Prompt engineering, Prometheus, Bash, Ansible, Amazon S3, CI/CD, Amazon EC2
**Data Engineering:** Flink SQL, ETL/ELT, Apache Kafka, Apache Flink, ClickHouse, Apache Airflow, PostgreSQL, MySQL
**Languages:** SQL, Python, C++
**Machine Learning and AI:** Flask, LangChain, RAG

## Professional Experience

**Data Engineering Intern** Jul 2024 – Present
*InsOps Inc.* *Chicago, Illinois*

- Developed data pipelines in AWS using AWS Glue, Lambda, EMR, SQL, and Apache Airflow for orchestration, with S3 cloud storage, for scalable data ingestion, transformation, validation, and analytics
- Built data workflows integrating SQL Server, Azure SQL, AWS S3, and cloud databases, preparing structured datasets for downstream data science and analytics

**Teaching Assistant** Sep 2024 – May 2026
*University of Arkansas, Dept. of Computer Science and Engineering* *Fayetteville, AR*

- Supported 100+ students in Programming Foundations through laboratory instruction, debugging assistance, and mentorship in C++ programming fundamentals

**Research Assistant** Sep 2024 – Jan 2026
*AICV Lab, University of Arkansas* *Fayetteville, AR*

- Built reusable preprocessing workflows to segment, organize, and transform raw image/video data into structured inputs for downstream processing and evaluation
- Evaluated results using mAP, MOTA, IDF1, PSNR, SSIM, and FID

**Project Engineer** Jun 2023 – Jun 2024
*Soliton Technologies* *India*

- Designed and developed a C# WPF desktop application integrating C#, Python, and LabVIEW-based test workflows to streamline application usage and improve test automation
- Developed customized software solutions for Dräger as the sole developer, automating approximately 94% of manual test cases while meeting medical-device quality and validation requirements

## Projects

**AWS Batch Ingestion Pipeline for Media Files** *Python, Amazon S3, AWS Lambda, Amazon EC2, Docker*

- Designed a batch ingestion pipeline in Python that uploads multimedia files to Amazon S3 and triggers AWS Lambda functions for format validation and metadata extraction
- Packaged processing workers as Docker images with environment-based configuration so the same pipeline runs locally and on Amazon EC2 instances
- Added structured logging and Prometheus metrics endpoints so job progress, queue depth, and failures can be tracked from Grafana dashboards

**Real-Time Medical IoT Analytics Platform** *Apache Kafka, Apache Flink, Flink SQL, Python, ClickHouse, Grafana*

- Developed an end-to-end, sub-second latency streaming platform using Apache Flink SQL and Apache Kafka to ingest, process, and score high-frequency medical IoT device data
- Implemented temporal Flink OVER windows partitioned by device ID to compute rolling Z-scores over 5-second sliding intervals, applying custom watermark delay strategies to handle out-of-order streams
- Designed ClickHouse MergeTree schemas sorted by composite keys to align disk layout with clinical query patterns, with an optimized Python multi-topic batch consumer isolating ingestion
